**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen J. LeBlanc on March 17, 2009.

The application has been amended as follows:

Please change the title to:

**METHOD AND APPARATUS FOR REMOTE POWER MANAGEMENT AND MONITORING**

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 21, 2009 has been entered.

***Information Disclosure Statement***

3. The information disclosure statement filed January 21, 2009 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document;

each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

***Allowable Subject Matter***

4. Claims 7-11, 14, 16-17, and 19-22 allowed.
5. The following is an examiner's statement of reasons for allowance:

Claims 7-11 are allowed because none of the prior art of record discloses or suggests a controller receiving current draw data from two or more current sensors each individually sensing current drawn through one of the two or more relays, the two or more current sensors thereby providing separate current readings for separate power outputs to the logic controller, in combination with the remaining claimed features.

Claims 14, 16-17, and 19-22 are allowed because none of the prior art of record discloses or suggests sensing current using two or more current sensors, each individually sensing current drawn through the two or more controllable relays, the two or more current sensors thereby providing separate current readings for the separate power domains, in combination with the remaining claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

6. Applicant's arguments, see Remarks, filed January 21, 2009, with respect to the rejections of claims 7 and 14 have been fully considered and are persuasive. The rejections of claims 7 and 14 have been withdrawn.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US patent of Shorty (6,879,806) discloses a similar system, and the US patent of Ewing et al. (7,171,461) discloses a smart power manager with individual sensing of current through two or more relays; however, the Applicant swore behind Ewing's earliest priority document disclosing this feature in the Affidavit of inventor Charles Reynolds under 37 CFR 1.131 filed June 22, 2007.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hal I. Kaplan whose telephone number is 571-272-8587. The examiner can normally be reached on M-F 8:30-5:00.
